

PATENT
Docket No.: LMPY-6710

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Group Art Unit: 2874

Examiner: Leon Scott, Jr.

Serial No.: 09/574,921

Filed: May 19, 2000

In re Application of: Juergen Kleinschmidt

For: REDUCTION OF LASER SPECKLE IN PHOTOLITHOGRAPHY BY
CONTROLLED DISRUPTION OF SPATIAL COHERENCE OF LASER BEAM

<p style="text-align: center;"><u>Certificate of Facsimile</u></p> <p>I hereby certify that this correspondence is being transmitted to facsimile number (703) 746-4853 on <u>March 20, 2002</u> Signed <u>Gerry Ubau</u> Gerry Ubau</p>

ELECTION AND AMENDMENT

Director of Patents
Box Amendment
Washington, D.C. 20231

Dear Sir,

Further to a telephone discussion with the Examiner wherein a restriction requirement was conveyed to the undersigned attorney, Applicant respectfully elects Claims 12-41 for further prosecution on the merits. In addition, please cancel claims 1-11 and 42-71, without prejudice as being drawn to non-elected species.

Further to a further telephone discussion with the Examiner, please add the following new Claims 72-73, and amend the rest of the pending claims as follows:

12. An apparatus for reducing speckle of a laser beam comprising a DUV-VUV transparent substrate configured to alter at least a first portion of the beam transmitted through at least a first region of the substrate relative to light transmitted outside of the first region of the substrate, such that the substrate generates a desired minimum number of spatially coherent cells in the laser beam.
